Attachment - List of External Tools

Tool Name	Description and Cookies Usage
Cloudflare	We use Cloudflare as our cloud provider, leveraging Workers, Queues, CDN, and Cloudflare Analytics to enhance performance and security. Cloudflare may set cookies to optimize content delivery and protect against malicious traffic.
On-Premise Sentry	We use On-Premise Sentry for error reporting and user session logging. This tool helps us track and diagnose application errors in real time. It does not set cookies but may collect anonymized diagnostic data.
Google Tag Manager	Google Tag Manager, provided by Google LLC, is a tool for managing tags and loading scripts on our website. It does not store any personal data but enables the implementation of third-party scripts that may use cookies.
Paddle	Paddle is our payment provider, handling secure transactions. It may set cookies to manage session states, payment verification, and fraud prevention.
Google Ads	We use Google Ads for remarketing and advertising purposes. When you visit our website, Google may place remarketing cookies on your device to display relevant ads based on your browsing behavior.
YouTube	Our website may embed YouTube videos, which are hosted by Google LLC. YouTube may use cookies to track video performance, user engagement, and personalized content recommendations.
LinkedIn Insight Tag	The LinkedIn Insight Tag allows us to measure ad performance and website conversions. It may set cookies to track LinkedIn users' interactions with our website.
Neon.tech	We use Neon.tech as a database layer to manage serverless PostgreSQL. It does not store cookies but helps in optimizing database performance and scalability.
AWS (Amazon Web Services)	Our backend infrastructure is hosted on AWS, specifically on servers located in Frankfurt, Germany. AWS may use tracking mechanisms for service performance monitoring and security.
Hasura.io	Hasura acts as our API gateway, facilitating efficient communication between frontend and backend services. It does not use cookies directly but may process API requests that contain user-related data.

Google Workspace	We use Google Workspace for email communication. Emails sent to and received from our domain are processed through Google's secure servers. Google may store metadata for spam detection and security.
Resend.com	Resend.com is our email service provider, responsible for transactional and notification emails. It does not use cookies but processes email metadata for delivery optimization.
Anthropic	Anthropic provides AI language model APIs that we use for legal document analysis. No cookies are stored, but interactions with the API may involve data processing.
OpenAI	OpenAI supplies AI-based language models for our platform. The API does not use cookies but processes user queries to generate responses.
Slack	We use Slack for external communication. It may store cookies to maintain user sessions and preferences across devices.
